

## **The Future of Construction: Intelligent System Solutions by ZF – Efficient, Clean, Safe and Connected**

- **ZF is Efficiency – higher performance and less fuel consumption**
- **Electrification – zero emissions and maximum performance**
- **Smart Construction – enhanced safety and intelligent connectivity**

**A lot of work lies ahead for the construction industry: fine dust from construction sites, fuel emissions and noise impact the environment and inhabitants alike. At the same time, the industry is about to see massive changes through macro trends such as electric mobility, digitalization and assistance systems.**

**At the CONEXPO trade fair in Las Vegas, ZF proves that as a specialist in driveline and chassis technology and intelligent system solutions, the Group is the ideal partner to overcome these future challenges.**

### **Intelligent and innovative system solutions from ZF at CONEXPO 2020**

At this year's CONEXPO the company shows forward-looking solutions for construction machinery and sets the focus on Efficiency, Electrification and Smart Construction (fig. 1).

ZF offers tailor-made and efficient drive solutions for all vehicle classes and technology levels and, with its "Best Choice" strategy, provides the right solution according to the respective customer and market requirements (fig. 2).

In order to further increase productivity and efficiency, Electrification plays an equally central role. ZF strives to achieve the "Vision Zero" principle - a world of mobility without local emissions, without accidents and without technical failures.

Another highlight, ZF will present Smart Construction technologies with a focus on Safety and Connectivity. Doing so, ZF demonstrates its expertise as a technology leader with a broad system competence. Efficient, clean, safe and connected: This is the Groups answer to the challenges the construction industry is facing today more than ever.

**ZF Friedrichshafen AG**

ZF is a global technology company and supplies systems for passenger cars, commercial vehicles and industrial technology, enabling the next generation of mobility. With its comprehensive technology portfolio, the company offers integrated solutions for established vehicle manufacturers, mobility providers and start-up companies in the fields of transportation and mobility. ZF continually enhances its systems in the areas of digital connectivity and automation in order to allow vehicles to see, think and act.

In 2018, ZF achieved sales of €36.9 billion. The company has a global workforce of 149,000 with approximately 230 locations in 40 countries. ZF invests over six percent of its sales in research and development annually.
