

Intermot 2018 – ZF Aftermarket present with expanded product range of the brands TRW and Sachs

- **New in the product range: Sachs motorcycle clutches**
- **TRW range includes brake components, handlebars and rear sets**
- **Safety and performance for motorcycles, scooters, trikes and quads**

At Intermot in Cologne, the leading international motorcycle trade fair, ZF Aftermarket will present its expanded product range for the two-wheel sector. In addition to the TRW range of spare parts and accessories for motorcycles, scooters, trikes and quads, Sachs motorcycle clutches will now also be sold in the aftermarket.

Many motorcycle manufacturers – from Aprilia to Yamaha – rely on ZF products because they trust in the competence and the components of a leading automotive supplier for driveline and chassis technology as well as active and passive safety technology. The Aftermarket division of ZF presents its range of high-quality products under the brand names Sachs and TRW in the aftermarket.

Sachs motorcycle clutches – available at ZF Aftermarket as of 2019

A defective motorcycle clutch generally announces itself beforehand. The most common signs include slipping of the clutch when starting to drive. Or shifting the gear is no longer possible despite the clutch being actuated. As of January 2019, riders of BMW motorcycles can count on Sachs clutches when replacement is required. They work continuously throughout the entire temperature range and transmit the highest torques. They are powerful, reliable and can help master extreme situations.

TRW – the legendary brand for motorcycle spare parts and accessories

In addition to the Sachs motorcycle clutches, the immense variety of TRW motorcycle spare parts and accessories will be presented at Intermot in Cologne. Whether for tourers, superbikes, scooters, enduros, trikes or quads – the range includes brake components, clutches, handlebars, brake and clutch levers, rear sets, jack-up kits and lowering kits as well as perfectly designed accessories. At Intermot, the latest highlights as well as the customised ranges for BMW, racing bikes and Harley-Davidson will be presented.

ZF Aftermarket constantly combines its product range with individual service solutions. This is why technical certificates of conformity (TÜV), installation instructions, mechanic tips, dimension tables for steel and aluminium handlebars as well as an order form for steel-braided special lines are available in the free download section on the website <https://www.trwaftermarket.com/en/motorcycle>.

ZF Friedrichshafen AG

ZF is a global leader in driveline and chassis technology as well as active and passive safety technology. The company has a global workforce of 146,000 with approximately 230 locations in some 40 countries. In 2017, ZF achieved sales of €36.4 billion and as such, is one of the largest automotive suppliers worldwide.

ZF enables vehicles to see, think and act. The company invests more than six percent of its sales in research and development annually – in particular for the development of efficient and electric drivelines and also in striving for a world without accidents. With its broad portfolio, ZF is advancing mobility and services for passenger cars, commercial vehicles and industrial technology applications.

With integrated solutions and the entire ZF product portfolio, the ZF Aftermarket Division of ZF Friedrichshafen AG guarantees the performance and efficiency of vehicles throughout their life cycle. Its combination of established product brands, digital innovations, customized products and services, as well as a worldwide service network, has made ZF a sought-after partner and number two in the global automotive aftermarket.

Under the Sachs and TRW product names, ZF Aftermarket offers a wide range of spare parts and accessories for motorcycles, scooters, trikes and quads. TRW products meet the extremely high quality standards of the international automotive industry. They ensure maximum safety and performance while featuring unique quality and appealing design.
