

## Solutrans 2021 – ZF Key Product Highlights

### Advanced Transics-Branded Fleet Management Solutions (FMS)

- **TX-SKY** – a powerful, brand-independent on-board computer with touchscreen, TX-SKY supports communication with the driver and communicates all driver and truck information, such as temperature sensors and document scanners, in real-time.
- **TX-FUELBOT** - at the cutting-edge of fleet fuel optimization, ZF's latest AI-based smart software solution automatically calculates and recommends the cheapest next refuelling stop in real-time.
- **TX-FUELCOMPASS** – An innovative, 'big-data' enabled telematics solution which monitors fuel consumption and provides best-cost refueling policies without the need to install a fuel sensor.
- **TRAXEE** – cost-efficient FMS which enables operators to better coordinate fleet capacity, manage driver activity and lower administrative overheads.
- **TX-TRAILERPULSE** - an innovative, cost-efficient trailer telematics solution now available with or without a rechargeable battery, it combines real-time track and trace functionality with trailer health and diagnostic information.
- **TX-TRAILERFIT** - a diagnostics-oriented back-office platform that processes and visualizes the technical performance and health of trailers to optimize maintenance activities and enhance safety through driving style analysis.

### Putting Trailers Ahead

- **Trailer iEBS** - the next generation of ZF's market leading intelligent Electronic Braking System for trailers, available in Standard and Premium variants, is suitable for all trailer types and applications.
- **ZF Trailer SmartBoard** - improves vehicle uptimes by monitoring and operating a range of trailer functions, integrated in a single box.
- **OptiTire** - Advanced Tire Monitoring System provides enhanced safety and efficiency for the widest range of commercial vehicles and all rim sizes.

### Aftermarket Support

- **WABCO Retrofit Solutions** - offers access to key technologies as after vehicle purchases such as **OptiTire**, **OptiFlow** aerodynamic systems and **OptiLock** digital trailer locking.
- **WABCO Original** – range of industry-leading quality Original Equipment parts, including modular ABS sensors, deliver peace of mind.
- **ProVia** - the budget aftermarket parts brand for braking systems offers reliable products manufactured to industry-leading standards.
- **Reman Solutions** - a cost-efficient, environmentally friendly service that converts used electronic, hydraulic, mechatronic and conventional mechanical components to fully warranted, as-new products. The range now includes axle modulators and TEBS-E 5.5.
